

Open Research Data Management: policies and tools

Open Research Data Management: policies and tools

May 24-25

Milano, Università Statale

Paolo Budroni, University of Vienna, Library and Archive Services, Head of Dpt.

His long-term involvement in digital asset management and the provision of aligned services in the scientific community have provided him with a thorough knowledge of technical systems and the requirements of the academic world. Thanks to his engagement, the University of Vienna has participated in the projects like Europeana and OpenAIRE/OpenAIREplus. Currently, he has been appointed as the representative of the University of Vienna at COAR. In the [LEARN](#) project, he focuses on stakeholder engagement, policy development and alignment, impact and advocacy. He also offers his experience in the use of foreign languages in multi-national settings, his ability to plan and organise work programs and his good understanding of linkages between policies and cooperative practices.

Paolo Budroni earned his Dr. phil. in 1986 at the University of Vienna, completing a semiotic examination of "Don Camillo and Peppone." In 1988, he completed his education degree at the Vienna University of Economics and Business (WU) and in 1996, he received a postgraduate degree in European Integration for Public Administration at the Austrian Federal European Academy. In 1991, he headed the realization of the first Current Research Information System (CRIS/ DonKey) of the University of Vienna (1991-1998). While on sabbatical (2001-2005), Budroni worked as a docent for marketing courses at the graduate level at the Università degli Studi di Perugia (Scienze della Comunicazione), and as Marketing Manager and, later, as Strategic Business Development Manager for a German telecommunications firm (Materna). Back in Vienna in 2005, he led as Managing Director the development of the digital archiving system for RDM of the University of Vienna, which also serves as Institutional Repository of the University (Phaidra, 2007-2016, <https://phaidraservice.univie.ac.at/en/a-look-into-phaidra/>). Today Phaidra is used in 5 European countries and is running at 15 institutions (among them the Austrian National Funding Agency FWF, see also: www.phaidra.org). From 2014 to 2016, he has also been the Managing Director of the of the nation-wide project e-Infrastructures Austria (26 partners, all Austrian Universities), which aims to create an Austrian network of competencies in the field of university repositories and research data (www.e-infrastructures.at).

European or National projects (led or acquired): OpenAIRE, Europeana Libraries, TEMPUS in the Western Balkan Region, e-Infrastructures Austria, Open Education Austria, H2020-LEARN (WP3, Policy Development and Alignment <http://learn-rdm.eu>).

Paolo Budroni is the Austrian National Delegate to the e-Infrastructure Reflection Group (e-IRG) (<http://e-irg.eu/delegates>) and represents the University of Vienna at COAR.
