Open Research Data and Open Science

---

**DANIELE MARINAZZO**

Daniele Marinazzo is a professor of Neuroimaging data analysis at the faculty of Psychology of the University of Ghent, Belgium.

As a physicist working in the neurosciences, his interests and collaborations span a wide range of disciplines and applications. He is an editor at PLOS One and PLOS Computational Biology, and a greedy user of public data.

**PAOLA MASUZZO**

Paola Masuzzo is a (soon to graduate) PhD student at the Computational Omics and Systems Biology group at UGent, Belgium. With a background in Biomedical Engineering, she is now busy in Bioinformatics, developing open source tools and algorithms for the analysis and dissemination of cell migration data. She is an advocate of Open Science, especially in terms of open source, open data, and open access.
