

Open Research Data and Open Science

Marjan Grootveld

Abstracts:

Horizon 2020 Open Research Data Pilot and tools from OpenAIRE and EUDAT

As of 2017 all new Horizon 2020 projects will by default participate in the Open Research Data Pilot. This means they have to 1) write in a Data Management Plan how the project members will deal with the research data, in order to 2) make the data Openly Accessible in a research data repository.

Whereas Horizon 2020 makes these demands it also funds OpenAIRE and EUDAT. These projects offer expertise and data services to help researchers and research organisations in making data management and Open Access (when possible) become “all in a day’s work”. In this session I’ll present a selection of these tools.

Training: what you need to know to succeed with your Data Management Plan

Building on the Data Management Plan mentioned earlier, in this “speed training session” you will do some of the planning yourself...
